- Approximately \$7 Million in International Sales of Oral TPOXX® in the Second Quarter -**
- Authorization of Additional \$50 Million Share Repurchase Program -**
- Corporate Update Conference Call Today at 4:30 PM ET**

August 5, 2021, 4:05 pm ET

NEW YORK -- SIGA Technologies, Inc. (SIGA) (NASDAQ: SIGA), a commercial-stage pharmaceutical company, today reported financial results for the three and six months ended June 30, 2021.

“SIGA’s second quarter financial results show a steady continuing positive result of international revenues,” said Phil Gomez, CEO of SIGA. “In the second quarter, we had \$7 million of international revenues from oral TPOXX® deliveries to Canada, building on \$3 million of international revenues from Canadian deliveries in the first quarter. These sales represent our first success in a multi-year initiative to build an international business for oral TPOXX®. In coordination with Meridian Medical Technologies (“Meridian”) (through our international promotion agreement), we continue to actively work toward turning opportunities into additional sales. Specifically, we are currently working with Meridian in a new foreign jurisdiction toward finalizing an order that would be similar in size to the initial orders received from Canada in 2020 and early 2021. The timing of the completion of the order has been, and may continue to be impacted by the COVID-19 pandemic.

Summary Financial Results
(\$ in millions, except per share amounts)

Second Quarter 2021 in comparison to Second Quarter 2020

	Three Months Ended June 30, 2021		Three Months Ended June 30, 2020
Total Revenues	\$8.7		\$40.3
Operating Income ⁽¹⁾	\$0.0		\$28.8
Income before Income Taxes ⁽¹⁾	\$0.5		\$27.2
Net Income	\$0.2		\$20.9
Diluted (Loss) Income per Share	(\$0.00) per share		\$0.26 per share

Six Months Ended June 30, 2021 in comparison to Six Months Ended June 30, 2020

	Six Months Ended June 30, 2021		Six Months Ended June 30, 2020
Total Revenues	\$13.5		\$43.0
Operating (Loss) Income ⁽¹⁾	\$(2.0)		\$24.8
(Loss) Income before Income Taxes ⁽¹⁾	\$(0.6)		\$15.6
Net (Loss) Income	\$(0.6)		\$12.0
Diluted (Loss) Income per Share	(\$0.03) per share		\$0.15 per share

⁽¹⁾ Operating Income / (Loss) excludes, and Income / (Loss) before Income Taxes includes, costs in connection with the retirement of the Company's term loan, interest expense, interest income and adjustments to the fair value of the Company's outstanding warrant. Both line items exclude the impact of income taxes.

Key Activities for the Quarter:

- In April 2021, the Company delivered approximately \$7 million of oral TPOXX[®] to PHAC under the contract that was awarded in January 2021 ("2021 PHAC Contract"). The 2021 PHAC Contract, as well as the contract for the procurement of oral TPOXX[®] with the Canadian Military, were coordinated between SIGA and Meridian under the international promotion agreement that was entered into by the parties in June 2019.
- In April 2021, the Company filed a new drug application ("NDA") with the U.S. Food and Drug Administration ("FDA") for the intravenous formulation of TPOXX ("IV TPOXX[®]"). The approval of a second formulation of TPOXX[®] would increase the addressable patient population to those who are too ill to swallow oral capsules. The FDA review process will typically take 10 months for this type of submission.

Share Repurchase Activity

During the second quarter of 2021, SIGA repurchased approximately 1.0 million shares of its common stock, for approximately \$6.6 million. Since the inception of the current share repurchase program in March 2020, the Company has cumulatively repurchased approximately 6.5 million shares of its common stock for approximately \$42 million.

Authorization of Additional \$50 Million Share Repurchase Program

The Board of Directors authorized an additional share repurchase program ("New Repurchase Authorization") under which the Company may repurchase up to \$50 million of the Company's common stock through December 31, 2023. Shares can be repurchased under the New Repurchase Authorization once the maximum amount allowed to be repurchased under the current program, which was authorized in March 2020, has been repurchased, or once such program has expired. The timing and actual number of shares repurchased, if any, under the New Repurchase Authorization will depend on a variety of factors, including: exercise of procurement options under government contracts, alternative opportunities for strategic uses of cash, the stock price of the Company's common stock, market conditions, and other corporate liquidity requirements and priorities. This repurchase program does not obligate the Company to acquire a specific dollar amount or number of shares and may be modified, suspended or discontinued at any time. Repurchases under the program may be made from time to time at the Company's discretion in open market transactions, through block trades, in privately negotiated transactions, and pursuant to any trading plan that may be adopted by the Company's management in accordance with Rule 10b5-1 of the Securities Exchange Act of 1934, as amended, or otherwise.

Conference Call and Webcast

ABOUT SIGA TECHNOLOGIES, INC. and TPOXX®

SIGA Technologies, Inc. is a commercial-stage pharmaceutical company focused on the health security market. Health security comprises countermeasures for biological, chemical, radiological and nuclear attacks (biodefense market), vaccines and therapies for emerging infectious diseases, and health preparedness. Our lead product is TPOXX®, also known as tecovirimat and ST-246®, an orally administered and IV formulation antiviral drug for the treatment of human smallpox disease caused by variola virus. TPOXX® is a novel small-molecule drug and the US maintains a stockpile of 1.7 million courses in the Strategic National Stockpile under Project BioShield. The oral formulation of TPOXX® was approved by the FDA for the treatment of smallpox in 2018. The full label is here: <https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=fce826ab-4d6a-4139-a2ee-a304a913a253>. In September 2018, SIGA signed a contract potentially worth more than \$600 million with BARDA for additional procurement and development related to both oral and intravenous formulations of TPOXX®. About Smallpox¹

Smallpox is a contagious, disfiguring and often deadly disease that has affected humans for thousands of years. Naturally occurring smallpox was eradicated worldwide by 1980, the result of an unprecedented global immunization campaign. Samples of smallpox virus have been kept for research purposes. This has led to concerns that smallpox could someday be used as a biological warfare agent. A vaccine can prevent smallpox, but the risk of the current vaccine's side effects is too high to justify routine vaccination for people at low risk of exposure to the smallpox virus.

COVID-19 Pandemic

The COVID-19 pandemic has caused significant societal and economic disruption. Such disruption, and the associated risks and costs, are expected to continue for an indeterminate period of time. Given the uncertain scale, scope, and current and future impact of the pandemic, the Company is regularly reviewing business and financial risks, and seeking coordination with its government partners with respect to the performance of current and future contract timing and execution. Additionally, the Company is coordinating closely with service providers and vendors, in particular contract manufacturing organizations that constitute our supply chain, with respect to actions and risks caused by the COVID-19 pandemic. Finally, the Company has proactively provided its employees with resources and other support to help ensure continued success in remote work settings as they navigate the current pandemic environment.

The COVID-19 pandemic has not adversely affected the liquidity position of the Company, nor is it currently expected to have a material adverse effect on the financial condition of the Company. The pandemic has and may continue to delay the timing of international contract awards for oral TPOXX® given the need of government officials to focus on meeting the demands of the current COVID-19 pandemic. Additionally, the pandemic could result in a slower pace of product deliveries if the pandemic results in shortages or delays in the receipt by the supply chain of raw materials and other essential items for manufacturing. Otherwise, the pandemic is not currently expected to have a material adverse effect on the short-term financial results of the Company, although the Company cannot provide assurances as to the ultimate impact of the pandemic upon the broader macro environment or the Company's industry.
